

GRU and Smart Business Planning

GRUCom Helps TSG Technologies Stay Connected

Providing the Southeastern United States and the Caribbean with water and wastewater services, TSG Technologies, Inc. understands the importance of maintaining a connection to the world by not only providing cost effective water treatment solutions to its clients but also taking advantage of GRUCom's fast, reliable and always available fiber optic network to ensure an efficient business.

"TSG serves a diverse geographic region, making GRUCom's communication capabilities a crucial part of our business," said Jerry Reeves, IT Manager at TSG. "GRUCom's fiber optic network enhances and completes our company, offering a cost effective, reliable tool for conducting day-to-day business and embracing new and emerging technologies."

Serving several locations, the TSG-Gainesville office specializes in the design, construction and operation of water and wastewater treatment facilities. When finalizing plans to relocate to a new site in East Gainesville, TSG wanted to ensure that the new building would have access to GRUCom's fiber network, a "must have" according to Reeves.

"When we learned of our need to relocate, our first concern was the fact that we did not have service on our new property," said Reeves. "All it took was a phone call to GRUCom and the fiber was installed, another reason why working with a responsive local entity like GRU is best."

The source of the fiber optic network's success is the large bandwidth available to GRUCom customers. Large bandwidth allows for more information to travel through the network at high speeds, an appealing factor for businesses like TSG that use several communication tools during daily operations.

"The greatest advantage of GRUCom's service is the amount of bandwidth available that can accommodate our large amounts of data received from locations around the world, our voice over IP long distance service and our email systems," said Reeves. "Without GRUCom, we would have to purchase at least three T1 connections, resulting in a significant cost increase."

GRUCom delivers the most reliable, fastest and affordable network for small businesses. Any company can reap the rewards of our blazing, cost effective and rock solid fiber optic network.
