Dear Mr. Wisco:

New River Regional Landfill is a multi-county regional integrated solid waste authority representing Baker, Bradford and Union Counties. We also have contracts through 2018 with Alachua and Levy Counties. The combined Class I MSW disposal rate is currently 850 TPD.

NRRL has been innovative in our approach of solid waste disposal and has been the recipient of several grants including the State of Florida Bioreactor Stabilization Research Project with UF and UCF being the principle research teams.

NRRL historically has been open to new concepts and technologies. It is my understanding that GRU wishes to explore a partnership in an alternative energy source including possible solid waste sources. Our staff will be glad to discuss with you your ideas and concepts.

You can reach me at the address below or by calling our office at 386.431.1000.

Sincerely,

Darrell O'Neal  
Executive Director
