

"Spot It, Avoid It, Report it" – A Power Line Safety Program

Teach Your Students How to Stay Safe around Downed Power Lines

We're offering an engaging educational program designed to teach students about the dangers of downed power lines and what to do in an emergency. With the recent increase in extreme weather, it's more important than ever for people to understand the risks and safety protocols associated with downed power lines.

Program Highlights:

- **Interactive Safety Workshop** – Students learn how to identify downed power lines, recognize unsafe areas, and avoid hazards.
- **Linemen Gear** – Hands-on activity to show the skills linemen must have to stay safe while providing this essential service.
- **Visual & Engaging Safe City** – Our program uses visuals and demonstrations tailored to different age groups for maximum impact and retention.

Booking Information:

- **Duration:** 1-2 hours (adaptable to school schedules)
- **Ages:** Suitable for Grades K-8th, with age-appropriate content

Our team of experts has years of experience in electrical safety and community outreach. We're passionate about ensuring students understand these important concepts in a way that's engaging and memorable.
